Environmentally responsible

Independently verified Environmental Product Declaration

In another first for the world leaders in instant drinking water systems, Zip has released an internationally recognised and independently verified Environmental Product Declaration (EPD) for its HydroTap products. Developed with leading sustainability consulting company, **thinkstep***, it is the first EPD for an electrical product in Australasia, clearly demonstrating Zip's innovative and forward-thinking approach.

The HydroTap EPD details the environmental impact of the product throughout its life cycle, from the production and processing of raw materials, to manufacturing, distribution, installation, ongoing usage, maintenance and filter changing, right down to the end of the product's life.

Australians buy **over 580 MILLION** litres of bottled water a year.

Much of which ends up in **LANDFILL** and on our **BEACHES**#
